

2023 CUSTOMISED RANGE

A UK Company with over 17 manufacturing processes Creative bespoke design and manufacture only restricted by your imagination

ABOUT US

Ancestors® was established in 1992 and has developed and evolved with a solid background and track record in research, creative design, sourcing, and UK manufacturing for the heritage and corporate sectors. The company has become uniquely placed to service these industries through its extensive knowledge and manufacturing capabilities.

We have been working with many heritage sites producing custom ranges and items since our inception and are proud of our association with the British Museum, Historic Royal Palaces, Victoria and Albert Museum, English Heritage, Historic Environment Scotland, Westminster Abbey, House of Commons, and numerous other heritage centers. Our factory has grown considerably over the years to enable us to manufacture a diverse range of products using different media which can be seen through this brochure but it really is only limited by your imagination.

OUR MULTITUDE OF MANUFACTURING PROCESSES INCLUDE

Laser Cutting

Laser cutting services cut parts from a wide variety of materials, ranging from plastics to organic materials to metals. From the most precise angles and corners to rounds of any radius, we are equipped to laser cut jobs of any size and volume. We're fit to work on large commercial productions or small prototyping runs.

High Definition Resin Doming

Our cutting edge technology can seal your decal in an automotive-grade coating that is crystal clear and very hard-wearing. We combine the highest quality crystal clear resin with a print quality of up to 2400 x 1200 dpi.

Jewellery Design

We currently design and produce quality jewellery for The British Museum, London; The Victoria and Albert Museum, London, Westminster Abbey, Edinburgh Castle, The National Gallery and many others. Whilst we specialize in costume /fashion jewellery we can also offer Fine Silver and Gold jewellery design.

Lamination

Protect and preserve your print. Lamination also deepens & brightens colours and improves contrast.

Crushed Marble Resin Casting

Detailed casting used for making our Studio Anne Carlton chess sets and any statue or resin item.

Enamelling

Our cold enamel process offers the advantages of traditional enamelling without the need and expense of kiln Firing.

Dye Sublimation

A process to professionally and permanently apply an image into the surface of ceramics and other items.

Wiro Binding

for making notepads and calendars.

Lead-Free Pewter

Casting capability to cast almost any 3D model up to a maximum size of around 12cm.

Laser Engraving

We currently have 2 Trotec Speedy 300 precision machines, one fibre for metal and one C02 for organic material. We can handle laser engraving jobs on all scales, even large volume production.

Laser Marking

Our Laser Marking operation employs many different laser systems including CO2 and Fibre lasers to deliver the highest detail and quality available on nearly any material. any material.

Micro Soldering

Our skilled craftsmen create items from different metals eg. cuff-links steel parts onto cast pewter decorations.

Gold Blocking

The traditional process of personalising stationery and leather goods, with metallic gold or silver foil.

Pad Printing

For personalising many items including our famous Goose Feather Pens.

Frame Making

We specialise in creative and innovative framing and can also decorate frames by hand.

Swarovski Crystal Gemming

For miniature replica crowns and jewellery.

High Definition Ink Jet Printing

Large scale banner printing through to fine detail doming jobs including our flexible magnets.

Hand Painting

For painting miniature crowns, figures and chess sets.

Digital Printing

Up to 300gms card for most packaging requirements.

ANC Manufacturing is a leading supplier to promotional product distributors. We are a proud member of the Giftware Association, the British Jewellery Giftware & Finishing Federation and the Association for Cultural Enterprises.

Being part of the Ancestors Ancestors® Group, established in 1992. The business has developed and evolved with a solid background and track record in research, design and manufacturing for the heritage and corporate sectors. The company has become uniquely placed to service these industries through its extensive knowledge and manufacturing capabilities.

Over 17 different manufacturing processes are carried out in our premises in Folkestone and all can be used to create great products swiftly for the promotional market.

Crystal Clear Polyurethane High **Definition Resin Doming**

A domed label is simply a sticker with a protective resin coatina. The glossy look of the resin gives an eye-catching 3d effect to label making. It is a very popular choice to ensure your product and brand stand out. The flexibility of our Crystal Clear resin offers further options to place onto flexible products such as our flexible fridge magnets. This amazing liquid encapsulation creates a domed magnification of an image whilst protecting it for a much longer life. Our services can include the printing and cutting of artwork and we pride ourselves on the High Definition of print we can achieve on our own specially-made high-quality polyester paper and high-resolution inkjet printers.

What are Dome Adheasive Labels used for?

Because of the way these labels are produced they are permanent and do not show signs of wear and tear. They are a great way

to promote branding and products and are often used by equipment manufacturers who apply them to their products using the 3-dimensional element for eye-catching effect towards the brand. As well as making your label stand out the resin coating is highly durable, UV resistant, and will not scratch or dent due to its bounceback properties. Domed labels are very durable and are suitable for both indoor or outdoor applications and will endure long-term use. These domed labels are also known as badge labels; 3d labels; 3d stickers; bubble labels; bubble badges and resin labels. Using our UK dome label facilities gives you the edge on competitors waiting for longer worldwide deliveries. With our latest acquisition of the newest epoxy machine on the market, we can now offer a faster turnaround with more cost-effective prices than ever before.

What are the Benefits?

These self-adhesive labels have many benefits and options. They can be applied to many different surfaces including those rounded or

curved. Each label is hard wearing and self-healing which means it is scratch and dent-proof and looks "like new" after years of wear. The resin provides UV protection ensuring the design will not fade or yellow when exposed to daylight providing endless protection against other elements and environments.

Prestigious applications where image is important include the following: IT; promotional and automotive applications (wheel centres, gear shifts, etc); short or long run applications; name badges; asset labelling and areas of high impact or areas prone to abrasion.

MADE IN GREAT BRITAIN

METAL CASTING

(LEAD-FREE PEWTER)

We can produce custom items using your designs or we can create designs for you. The production of all of our pewter products is carried out with a process called Spin Casting or Centrifugal Casting.

THE CASTING PROCESS

Our skilled artist use the traditional method of hand carving out of wax or pewter from original artwork or drawings.

A production mould is then made with the master casting being laid out on a silicone disc and then cured with heat and pressure in a vulcanizer.

This rubber mould is then spun in a centrifugal casting machine while pewter is poured into the centre of the mould resulting in a replica of the master metal design.

Once cooled this is then opened up and channels are cut for the molten metal to reach the impressions. These sub-masters are then put in a new production mould and placed into the vulcaniser and the above process repeated.

The completed castings are then fettled and rumbled to remove any sharp edges and imperfections then polished in a light detergent before being dried in the corn drying machine.

All pewter items can be finished in a variety of ways including polishing, to a bright silver colour finish; antiquing to accent the details or plated in silver, gold or other finishes.

CASTING MACHINES

We use Four modern Semi-Automated centrifugal casting machine for our mass production and have several stand-alone manual pouring machines for lesser amounts and more intricate work.

Per annum, we process over 36 Tonnes of Pewter Tin Alloy.

Manual centrifugal casting machine

ASSEMBLY

Highly skilled operators assemble and finish every item to exacting standards.

We can produce almost any shape including buttons; pin badges; golf ball markers; tooling; jewellery; findings; figurines; replica coins; medals; belt buckles; charms: key chains and many others.

NEW MACHINERY

Our latest purchase is this 100-litre capacity vibratory bowl finishing machine.

This takes over from traditional hand finishing of precision items taking our automated finishing to the next level.

LOW MINIMUMS & FAST DELIVERY

Are you looking for something different? Our "Crystal Lens" manufacturing capabilities provides a unique quality and feel to many of our products. Flexible rubber fridge magnets printed to museum quality standards and protected using clear epoxy doming resin. Hold and touch them, dig your nails into them and watch the mark bounce back without leaving a trace. The dome effect also gives a magnification and enhances the striking high image quality.

FLEXIBLE FRIDGE MAGNETS

A well-designed product will stay on display on the user's fridge for years, so if your thinking of a promotional item then this is a low-cost product with high exposure. The High-quality print and colours make for great creative freedom and are ideally suited to the souvenir market. They will stand out in front of all other magnets on sale.

Ancestors® Group is the leading manufacturer for the gift, souvenir and promotional marketplace. We have over 17 manufacturing capabilities that mean we can offer you low minimum order quantities and fast delivery.

We specialise in providing printed pencils in a choice of colour print options or with foil embossing to promote your business or brand. Our standard range of toppers from our TimeLine® brand is available to choose from, however, it is with our skilled model maker that we can offer you bespoke designs in lead-free pewter either polished, antiqued or gold/silver plated. Let us know if you have any other requests as we like a challenge.

For a no-obligation quotation for a bespoke design then please contact us. Ideally we would like a brief specification including; target recommended selling price; packaging; brand colours or logo; Quantity either initial or annual usage and if possible a photograph or website link.

We can also provide personalised packaging of the final product and provide samples of alternative styles to assist the selection process.

BESPOKE JEWELLERY

CREATE YOUR OWN EXCLUSIVELY DESIGNED JEWELLERY

All our custom jewellery is designed by Nicholas Humphery-Smith who has many years of experience working with companies like the British Museum, London; Victoria and Albert Museum, London, Westminster Abbey, Edinburgh Castle, National Gallery and many others. The quality of jewellery is very high, as expected for such prestigious customers, and whilst we specialise in costume/fashion jewellery we also offer Fine, silver and gold jewellery however the costs are substantially higher due to the current higher cost of precious metals.

Many customers ask if we can produce replicas and whilst this is possible, in our experience, we have found that to produce a true replica, the exact materials and size are required and this would need very detailed drawings and may not always be possible. Additionally, it can also take a very long time going backwards and forwards with samples to ensure the curatorial staff are happy with the finished item. We would therefore always suggest that we would work on an inspired piece of jewellery that would be more commercial and able to use modern finishes, crystals and techniques. The finished item can be very similar to the original if required or developed into a fully inspired piece taking an aspect of an object.

So how do you proceed to get your own designed range of jewellery?

Stage 1. Send us clear instructions together with high-resolution images of the object/s to be turned into jewellery. If fashion jewellery then this can be created to look like fine jewellery if the price is an issue.

- **Stage 2.** We then turn the image(s) into a simple interpretation of what the jewellery would look like advising on the stones, crystals and finishes being proposed in a draft drawing. Time-scale 7 -10 days.
- **Stage 3.** You or your client then view the draft drawing and make any comments/changes. A possible re-submission may be required until all are happy with the design.
- **Stage 4.** The draft CAD drawing will be accurately drawn with sizes and relevant stone/crystal codes and a cost price will be prepared. Time-scale approximately 3 5 weeks.
- **Stage 5.** You or your client then consider the drawings carefully making any final modifications. Any re-drawings and re-pricing will take place at this stage until all is approved. Any re-drawings can take a further 2 weeks. Once the drawing is approved you then commit the project and minimum order quantities subject to receiving a satisfactory sample.
- **Stage 6**. Manufacture of the model and first sample 6 10 weeks depending on the complexity and assuming that the first sample is accepted. Changes at this stage can take a further 4 6 weeks.
- **Stage 7.** You or your client approves the samples and places an order for at least the minimum quantity quoted at stage 5.
- **Stage 8.** Manufacture of production pieces and supply of the order 7 10 weeks.

The minimum order quantity for a specific design does depend on each item and its value and if fashion or fine jewellery but would usually be between 25–50 pieces for each item. So long as the minimum is ordered then there is no charge for the design or modelling. If a piece does not go through to the ordering stage then there could be a charge for the model.

All fashion jewellery is made using lead-free pewter and where possible Swarovski elements. Silver and gold would be hallmarked (where required) in the UK and (if required) Jewellery will be handset with either diamonds, precious stones, cubic zirconia or Swarovski elements as directed depending on price.

We can also discuss packaging solutions for you either specific to your need or using our generic boxes and pouches. Most of the jewellery we produce tells a story and therefore we do like to produce a provenance or story card to go with each piece – telling a story does make the jewellery special and more collectable – we can help you with the story card, if required, and provide finished printed cards on the same small quantity as the jewellery using our in-house printing processes.

To get an idea of some of the jewellery we have produced in the past under licence for various museums please visit www.inspiredtreasures.co.uk. This site gives full retail prices all at good margins.

If in the first instance you would like to receive an opinion on the item(s) you are interested in then please forward images to me with your instructions. If you require any further information please contact me directly.

HERALDIC KEY-FOB, COASTER

312 Named British Heraldic Key-fobs and Coasters with English, Scottish, Irish and Welsh names available off the shelf.

Laminated and "Crystal Lens" Coasters from 91p each

The spinner is supplied FREE on loan and holds 180 names x 6 coasters a total of 1080 coasters. (Choose from a list of 312 names).

Available in two formats these felt backed 88mm diameter coasters show the surname history and an associated coat of arms in full colour.

They can be supplied laminated in the traditional style or can be

enhanced using our unique "Crystal Lens" covering, this gives a special quality and feel, lifting the image to a new level.

Any name can be researched and produced and top-ups are available in minimum quantities of 6 per name.

Laminated coasters (code 00022) $(1080 \times £1.00) = £1,090.80$ $(540 \times £1.14) = £615.60$

"Crystal Lens" coasters (code 74201) $(1080 \times £1.80) = £1,944.00$ $(540 \times £2.06) = £1,112.40$

Acrylic and "Crystal Lens" Key-fobs from 79p each

The spinner is supplied FREE on loan and holds 312 names x 6 key-fobs a total of 1,872 key-fobs.
(Choose from a list of 312 names).

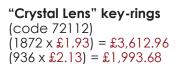

Available in two formats these key-fobs show the surname history on one side and an associated coat of arms, in full colour, on the other.

They can be supplied as traditional acrylic key-fobs or enhanced using our chrome key-rings with the unique "Crystal Lens" covering, giving them a special quality and feel, lifting the images to new levels.

Any name can be researched and produced and top-ups are available in minimum quantities of 6 per name.

Acrylic Key-fobs (code 0021) $(1872 \times £0.83) = £1,553.76$ $(936 \times £1.03) = £964.08$

AND PIN BADGE SPINNERS

HERALDIC

Great for all the family and really good for your male customers who can be tricky to cater for. Enamelled pin badges depicting your family Coat of Arms and your family motto. Presented on a gloss laminated gift card/keepsake which also gives you the origination of your name and the translation of your family motto.

The Coat of Arms are taken from authentic hand drawn original artwork associated with your name compiled by leading genealogists and heraldists. The range includes the top 194 UK Surnames researched from the latest census so you have the best offering for your customers.

The 200 pin display (we have doubled up on the top 6 surnames) makes it easy for your customers to see where their names are and also makes it easy for you to re-order and merchandise the display.

The stand is provided free on loan if ordering the complete spinner. Top up orders are available at 6 per name.

HERALDIC

First Name Origins (A4)

Discover the meaning of any first name with these decorative first name scrolls. Each scroll gives the meaning of the name, its origins and associations as well as lucky numbers. All are available either unframed or framed with a walnut-effect finish measuring (210 x 297mm).

Direct dispatch packaged size and weights:

Unframed size = 330 x 230 x 1mm weight = 75g Framed size = 335 x 245 x 20mm weight = 420g

History of First Name (A4)

The information given on these beautiful scrolls is fully researched from original manuscripts and reference books by our team of researchers who over the last three years have researched and added more than 300 first names each year and have never yet been beaten by a name. These attractive full colour documents can be printed on a variety of quality A4 (210x297mm) size papers as shown below.

Direct dispatch packaged size and weights:

Unframed size = 330 x 230 x 1mm weight = 75g

History of Surname (11 \times 14)

As mentioned before our Surnames histories are fully researched from original manuscripts and reference books by our team of researchers (unlike many other systems). Over the past three years we have added over 8,500 names to our list of surnames and pride ourselves on the fact that have never yet been beaten by any name even if this means commissioning research abroad. These full colour documents can be printed on a variety of quality 11x14 (360x280mm) size papers as shown below.

Direct dispatch packaged size and weights:
Unframed size = 400 x 297 x 1mm weight = 80g
Framed size = 400 x 325 x 20mm weight = 575g

History of Surname (A3)

These deluxe versions of our surname histories contain all the information given on the A4 and 11 x 14" scrolls detailed above but are produced in full colour on the larger A3 (420 x 297) sized paper.

Direct dispatch packaged size & weights:

WHITE

Unframed size = 440 x 320 x 1mm weight = 80g

Framed size = 465 x 345 x 20mm weight = 700g

History of Surname (A4)

Unlike many systems available today our surname histories are fully researched from original manu-scripts and reference books by our team of researchers. Over the past three years we have added over 8,500 names to our list of surnames and pride ourselves on the fact that have never yet been beaten by any name, even if this means commissioning research abroad. These full colour documents can be printed on a variety of quality A4 (210x297mm) size papers as shown below.

Direct dispatch packaged size and weights: Unframed size = $330 \times 230 \times 1$ mm weight = 75g Framed size = $335 \times 245 \times 20$ mm weight = 420g

Coat of Arms Prints

To produce these genuine Coats of Arms, our research team initially research the sur-name using original manuscripts and reference books to find a blazon (the heraldic description of the Arms) associated with the surname. Our artist then draws the various elements needed to produce the arms. Once completed our team then compile these elements as instructed by the blazon to create an accurate pictorial representation of the genuine Coat of Arms. Within the past three years we have added over 5,000 Arms to our collection and these are available as full colour documents printed on a variety of quality papers as shown below.

Coat of Arms (A4)

Direct dispatch packaged size and weights:

Unframed = $330 \times 230 \times 1$ mm weight = 75g Framed = 335 x 245 x 20mm weight = 420a

A3 Deluxe Scroll

This deluxe version of our Coat of Arms print is set within a heraldic boarder setting giving a wonderfully colourful display for that special touch.

Direct dispatch packaged size and weights:

Unframed = 440 x 320 x 1mm weight = 80g

Framed = $465 \times 345 \times 20 \text{mm}$ weight = 700g

Double Coat of Arms

A wonderful gift idea for weddings or anniversaries. This scroll gives two Coat of Arms, together with the special date, if required. Printed in full colour on parchment style A4 (297x210mm) or A3 (420x297mm) size paper.

Coat of Arms & Name Certificate

(Deluxe A3 Scroll)

This is our most comprehensive personalised document offering personalisation right down to a single individual. The scroll features the History of First Name, Surname and displays an associated coat of arms.

Printed onto fine quality parchment style A3 (420x297mm) size paper.

Direct dispatch packaged size and weights:

Unframed 440x320x1mm weight = 80g

Framed 465x345x20mm weight = 700g

Personalised Paperweights

Available in three different formats, First Name, Surname or Coat of Arms, these deluxe paperweights are the ideal solution for both home and office use.

The heavyweight glass measures 70mm in diameter and at 22mm in height keep your papers safe.

Choose a single item or group any variation of the three to form a set.

Direct dispatch packaged size & weights:

Single $205 \times 160 \times 35$ mm weight = 215g Set of 3 205 x 160 x 70mm weight = 700g

Heraldic Tondo Wall Plaque

This fully researched Coat of Arms is set into a finely hand crafted cold-cast metal resin plaque, set in high relief (200mm diameter). Available in two finishes, bronze or pewter, with name plate and hook.

Direct dispatch packaged size and weight: size = $100 \times 270 \times 95 \text{mm}$ weight = 1,060 g

Heraldic Writing Set

This unique gift set contains ten A5 sheets of parchment type paper displaying the Coat of Arms associated with any surname together with the name. Also included in the set are ten envelopes and ten pieces of A5 continuation paper in matching parchment type paper.

Direct dispatch packaged size and weights: size = 240 x 180 x 1mm weight = 160g

PACKAGING AND STORY TELLING

As with most of the products produced by Ancestors® the packaging and/or romance cards tell the story of the item enclosed.

Jewellery items generally have romance cards that include a picture of the original artwork that inspired its creation together with historical information or other details.

Other items mostly have Eurohooked packaging that includes space on the reverse to tell the story.

All can include barcodes and other sitespecific information and branding.

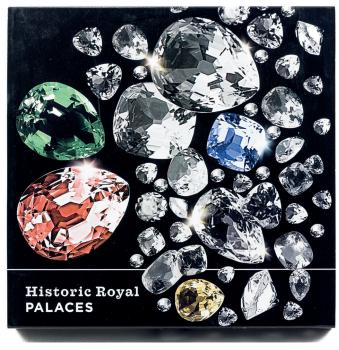

Left, a
Jewellery
Box with
silver
blocking
logo and
border
applied for
Westminster
Abbey

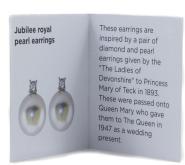

Above and left, a Jewellery Box sleeve and smaller Jewellery box, front and back designed for Historic Royal Palaces

BESPOKE BOXES AND SLEEVES

Above, coaster packaging for stained glass windows at Holy Trinity Church, Folkestone with branding and story text on the reverse

Right, Fridge Magnet packaging for the Rose Window in Westminster Abbey with story text, branding and barcode on the reverse

Left, Fridge Magnet packaging for the Dean's Eye Window in Lincoln Cathedral with story text, branding and barcode on the reverse

GENERAL ORDERING INFORMATION

Costs

All origination and artwork costs are included in the prices shown, therefore there are no hidden extra costs to be incurred. Where bar-coding is required and not directly printed on header card or product packaging then an extra charge of 2p per item is chargeable.

Artwork

We prefer to receive the PDF format artwork whenever possible, but all standard formats are acceptable at the highest resolution, at least 300dpi. Approval must be made at the customer's earliest convenience to achieve the stated delivery dates. Because of the numerous different printing production processes applied to the products, the colours shown on the artwork may vary slightly. If specific colour matches are required then colour swatches, previous examples or Pantone reference numbers should be provided.

Copyright

Orders involving the reproduction of original artwork are accepted on the understanding that the customer is either the copyright owner or has been given written permission to use it. Ancestors® Group will not be liable for any claim against the customer for copyright infringement. As such, Ancestors® Group is exempt against all incidental costs or consequential claims.

Lead Times

Being a genuine UK manufacturer means that, following customer approval for artwork, products are usually manufactured within 7-14 working days unless otherwise informed. We, therefore, avoid the long import schedules, that sometimes can exceed 20 weeks. Ancestors® Group cannot be held responsible for any delays due to circumstances beyond our direct control, and you will be informed, as early as possible, should any unforeseen delays occur.

Payment

New customers should satisfy us that they are genuine trade clients or distributors and, unless agreed in advance, will be issued with a proforma invoice and only after the funds have cleared our bank account will production commence. International buyers (those that are not resident in the UK) must provide a valid ID number. Credit facilities are available and can be applied for and once approved, credit accounts receive 30 days credit from the date of invoice. Longer terms are strictly by prior written agreement. We reserve the right to charge outstanding balances over 30 days a surcharge of 1.75% plus a daily interest rate of 3% above the Nat West bank rate prevailing at the time. Prices are as agreed and are subject to VAT and Carriage.

Carriage

Carriage will be paid by Ancestors® on all orders over £295 (UK mainland only). Carriage for orders under £295 is charged at £10.00 or at cost whichever is the greater unless other arrangements have been agreed. For overseas and off-shore Islands carriage costs will be supplied by quotation, available on request.

Reservation of Title

All goods remain the property of Ancestors® Group until paid for in full, but the risk passes to the buyer on delivery. Claims for damaged goods or shortages will not be accepted unless notified to the Ancestors® Group within 7 days. We reserve the right to examine the goods. Claims for non-delivery will not be accepted unless notified within 7 days of the invoice date.
